### **Genie Delivers High-Reaching Boom Lift to France's Mordefroy Levage**

*The SX™-180 superboom is ideal for wind turbine maintenance, telecommunications, and commercial construction applications*

Chartres, France (Oct. 29, 2024) — Mordefroy Levage has taken delivery of a Genie® SX™-180 boom lift, making the French equipment rental company one of just a few companies in France to own this 57-meter machine. The SX-180 is the tallest boom lift in Mordefroy Levage's fleet, and is Genie's highest-reaching lift.

"The addition of the SX-180 will enable Mordefroy Levage to support wind turbine maintenance, telecommunications, public services, and commercial complex construction," said Patrick Mordefroy, owner of Mordefroy Levage. Responsive extension delivers workers to a height of 19 floors in just under 5 minutes, contributing to productivity at extreme heights. "We selected the SX-180 because it complements our existing fleet and expands our capabilities to meet customer needs."

Mordefroy Levage specializes in crane and MEWP rentals for industrial maintenance, public infrastructure, and high reach construction. Mordefroy Levage and its sister company Jagulak together operate 20 handling units, 40 access platforms, and 15 cranes.

The SX-180's 2.38 m horizontal reach, and 3.05 m rotating jib with 135° vertical and 60° horizontal articulation deliver flexibility for workers to position the platform to access jobsites. A standard 2.44 m self-levelling platform has an unrestricted capacity of 340 kg, making it possible for two workers to be in the platform at once.

To help with transport, the SX-180 features the Genie X-Chassis® system. Axles extend for stable operation and driving at full height, and then retract for transport. The machine's narrow profile allows it to be fully loaded onto a low-bed trailer for height/width-specific transfers or even overnight transport.

Since 1997, Mordefroy Levage has built a reputation for investing in cutting-edge equipment. The company serves France from two locations in Barberey Saint Sulpice and Montereau Fault Yonne.

###

### **About Genie**

Since 1966, Genie has been the leading name in the aeriels industry. With offices, team members and manufacturing facilities around the globe, Genie lifts and telehandlers can be found enhancing safety and improving productivity on jobsites worldwide. Genie's ongoing leadership in aerial lifts and material handlers is built on our ability to consistently deliver superior quality for our customers. At Genie, we achieve this **quality** not by chance, but **by design**. For more information on Genie products and services, visit [www.genielift.com](http://www.genielift.com).

### **About Mordefroy Levage**

Founded in 1997, Mordefroy Levage is a company specializing in the rental of cranes with operators, articulated lifts, and handling equipment. Based in Troyes and Montereau-Fault-Yonne, the company operates in the Aube (10), Seine-et-Marne (77), and neighboring departments. With a diverse fleet of machines and a team available 24/7, Mordefroy Levage has established itself as a key player in lifting and handling services in France.
